You agree that:

- I) You will not use the token for fraudulent purposes;
- II) You will not duplicate, fully or in part, the name of an existing cryptocurrency or a well-known company with the aim of misleading users;
- III) You will not use names of states, other administrative units or municipal institutions for the token's name with the aim of misleading users;
- IV) You will not set a script on a smart asset that limits exchange transactions on Waves.Exchange by asset quantity;
- V) You will not give false information in a smart asset's description concerning the rules governing the token's use, which do not correspond to those of the script installed on it;

☒ I understand that in the case of non-compliance with the rules, my token will be categorised as 'Suspicious', and will be available for search only by ID.

Fee 1 WAVES
Your balance is not enough to pay transaction fees

What if you want to implement business rules and logics into your own asset?

ide.wavesplatform.com

Smart asset 

☒ Disable script

Script can be developed with [Waves Ride IDE](#)

Actions can lead to loss the asset.

We do not recommend you submit script transactions unless you are an experienced user. Errors can lead to permanent loss the asset.
