What is Sponsor Fee Transaction?

Understand how Transaction sponsorship works

How to implement transaction sponsorship

Sponsored Fee Transaction

**Type 14
Transaction**

**Sponsored fee feature enables users to pay
commision for transactions using a custom asset.**

Use cases:

- Free trial mode for dApps
- Convenient entry for dApp users
- Token usecase

Common Questions:

- How many tokens are deducted when a custom asset is used to pay for commission?
- Can token sponsorship be disabled?
- Who sponsors an asset?

How Transaction Fee Sponsorship Works

- ◆ The user pays a transaction fee using custom asset
- ◆ You get these tokens
- ◆ WAVES is deducted from asset issuer account in the required amount and token goes to miners

How to Implement Sponsored Fee

Lets do it!
